Hengelo, Netherlands | EU Citizen - no visa or sponsorship required

PROFESSIONAL SUMMARY

Junior Software Developer specialising in **Java**, **Spring Boot** and **React/TypeScript**. Delivered production software at Thales Netherlands, raising backend test coverage to **95%** and improving reporting accuracy by **25%** for **60+ internal stakeholders**. Independently designed, built and deployed a full-stack AI application (Google Gemini, Kotlin/Jetpack Compose, Node.js/MongoDB). Available immediately.

TECHNICAL SKILLS

Languages: Java, Kotlin, TypeScript, JavaScript (ESNext), Python, SQL, HTML5/CSS3
Backend: Spring Boot, Node.js, Express, REST API design, FastAPI, JWT authentication
Frontend: React, TypeScript, Jetpack Compose, Tailwind CSS
Databases: PostgreSQL, MySQL, MongoDB, Oracle, SQLite
Testing: JUnit 5, Mockito, Jest, PyTest, React Testing Library, unit & integration testing
DevOps & Tools: Git, Docker, Jenkins, GitLab CI, CI/CD pipelines, SonarQube, Jira
Mobile: Android (Kotlin, Jetpack Compose, MVVM, Hilt, Room, Retrofit)
AI: LLM integration (Google Gemini, Claude API), prompt engineering
Practices: Agile/Scrum, code review, Clean Code, SOLID, OOP, SDLC

PROFESSIONAL EXPERIENCE

Thales Netherlands

Feb 2026 - Jul 2026

Software Developer (Internship) - Hengelo, NL

- Improved reporting data accuracy by **25%** for **60+ internal stakeholders** by designing and shipping a Value Stream Mapping project-management tool built on Java/Spring Boot with a React/TypeScript frontend.
- Raised backend test coverage to **95%** by building unit and integration test suites with JUnit 5 and Mockito, protecting core business logic against regressions.
- Cut frontend development time for new modules by **~15%** by engineering a reusable React/TypeScript component and hooks library.
- Automated testing and static analysis on every commit by integrating Jenkins and SonarQube CI/CD pipelines, enforcing quality gates before merge.

Various Centres, Spain

2020 - 2026

Personal Trainer

Client-facing role prior to transitioning into software development.

PROJECTS

Hybrid.AI Training - Full-Stack AI Coaching Application (2026)

Kotlin | Jetpack Compose | Node.js | Express | MongoDB | Google Gemini | Render

- Shipped a production AI application end to end by integrating Google Gemini to generate personalised multi-week training plans, deployed on Render with MongoDB Atlas.
- Eliminated the app's dependency on connectivity by implementing offline-first persistence with Room in a native Android client (Clean Architecture, MVVM, Hilt, Retrofit).
- Kept all API keys and prompts off the client by proxying every AI call through a Node.js/Express REST API secured with JWT and Google Sign-In, behind a versioned response schema.
- Safeguarded releases by adding automated Jest test suites and Trivy security scanning.

CERTIFICATIONS

Building with the Claude API - Anthropic (2026) - Building LLM-powered applications: prompting, tool use, and API integration.

AI in Enterprise App Development - Lessthan3 (2026, 18 hours) - AI integration for business environments (FP Smart Track / CaixaBank Dualiza).

EDUCATION

HND in Multi-platform App Development - IES Julián Marías, Valladolid, Spain (2023 - 2026)

B.Sc. in Physical Activity and Sport Sciences - University of A Coruña, Spain (2016 - 2020)

Languages: Spanish (native) | English (professional working proficiency, B2)
